Overview

Full Stack Web Developer with **3 years of experience** developing production systems, integrations, and automation. Focused on building scalable, reliable applications with clean architecture and maintainable code.

Skills

- **PHP (Laravel), TypeScript / JavaScript (React, JQuery), Node (Express), MySQL, MongoDB, CSS (Tailwind), HTML**
- API Design & Integration, RESTful Services, Authentication & Authorization
- MVC Architecture, OOP, Scalable Application Design, Git (Github/GitLab), Docker, SSH, Postman
- Workflow Automation, AI Integration (LLMs), UI/UX, Claude Code,

Experience

Full-Stack Developer **Orro Group** (Australia-Based) *Ayala, Makati | Sydney, Australia* **Mar 2023 - Current**

- Developed and maintained a **large-scale enterprise platform** combining CRM, system monitoring, ticketing, and workflow automation using **Laravel, JavaScript, MySQL, and CSS Bootstrap**, ensuring performance, scalability, and reliability
- Built and integrated **AI-powered features using Azure OpenAI**, including a **context-aware internal chatbot and automation tools** that improved operational efficiency and reduced manual support workload
- **Designed and implemented integrations** with external platforms (Jira, ServiceNow, Freshservice) via **REST APIs**, collaborating directly with client developers to enable **real-time, bi-directional** ticket **synchronization** and **workflow automation**
- Engineered **network automation tools** using **SSH and REST APIs**, including **automated** device backups, remote command execution, and device inspection, reducing manual network management effort
- **Integrated system with network vendor platforms (Cisco Meraki, Fortinet)** to ingest and centralize real-time data, improving visibility and monitoring capabilities for managed services
- Developed **NOC automation** workflows for alert ingestion and response, **integrating multiple monitoring platforms** via **webhooks** to automate ticketing and escalation
- Improved **UI/UX** across the platform by implementing consistent **design patterns and responsive interfaces**, enhancing usability for operations and support teams
- Contributed to **code reviews, testing, and technical documentation,** maintaining high code quality and applying **MVC** and **OOP** best practices

Projects

- Messenger Clone - Full-Stack Chat Application (**React, Express.js, MongoDB, Tailwind CSS**)
  https://messenger-clone-iota-vert.vercel.app/
  - Built a real-time messaging app with user authentication and one-to-one / group chats
  - Implemented **real-time communication using web socket**, enabling live updates for messages, user presence, and chat state
  - Designed **database schemas** for users, chats, participants, and messages, handling relationships and data consistency
  - Managed complex UI **state**, **side effects, and shared application data** in React **components** to support real-time behavior
  - Optimized performance using **pagination, lazy loading, and optimistic UI updates** for responsive interactions.
  - Implemented **JWT-based authentication** and developed a responsive UI with Tailwind CSS.
  - Built a fully **responsive UI using Tailwind CSS** for desktop and mobile devices

- MILE 365 Run Club Landing Page and Admin Dashboard / Membership System (**React, TypesScript, Laravel, SQL, Tailwind CSS**)
  https://mile365-runclub-landing.vercel.app
  - Web application for a run club client - covering **landing page, membership system, and admin dashboard**.
  - Secure REST API with Laravel, implementing **token-based authentication** (Sanctum) and **role-based access control** (RBAC)
  - Responsive, **mobile-first** frontend with advanced form handling (**React Hook Form + Zod**), protected routes, and **React Query**.
  - Deployed and maintained a production environment using Docker, Vercel, and Render (with background workers), integrating **email notifications** and Cloudinary media services; **actively evolving features** aligned with the client's product roadmap.

- VaultPass Password Manager - Capstone Project (**PHP, Javascript, SQL, HTML and CSS**)
  - Implemented secure auth features: **bcrypt** password hashing, 2FA (TOTP + recovery codes), **rate limiting/account lockout**, and **session management**.
  - Protected sensitive data with **AES-256-GCM encryption** at rest plus **CSRF protection** and per-user access controls.
